Summary :

I am Aniket, currently pursuing B.Tech in Information Technology at KNIT.

I have knowledge of Machine Learning, Data Preprocessing, Deep Learning, NLP, and LLMs using PyTorch and TensorFlow.

I work with LLM fine-tuning, optimization, Generative AI with LangChain, and Agentic AI with LangGraph.

I also have experience in FastAPI backend development and React.js frontend development.

SKILLS

Programming Languages: Python, C++

Machine Learning : Data cleaning , Data Preprocessing, Machine learning Algorithms, Linear Regression, Logistic Regression and Classification, Decision tree, KNN, Ensemble algorithm, Random Forest Boosting Algorithm etc.

Deep Learning : ANN, RNN, CNN, Data Augmentation Technique, Transfer , Transformer etc.

NLP : Text Preprocessing Bag of Word, Tf-IDF, word2vec, Avgword2vec etc

LLM : Attention Mechanism, Temperature Scaling in LLM, Top K Sampling, Fine Tuning in LLM,

GEN AI : RAG, Prompt Engineering, Embeddings, Semantic Search, Vector Databases, LangChain, LangGraph, LLMs, Document Q&A

Agentic AI : (Agentic AI with Langgraph) , Handle Parallel, Iterative , HITL (Human in the loop), Loop Engineer workflows

FastAPI : RestAPI, Crud Operation, Endpoints.

Frontend : HTML , JavaScript, CSS , React.JS

Tools & Libraries:

Libraries:

Pandas, Numpy, Scikit learn, Pytorch, Tensorflow, Transformer, Huggingface, Langchain, Langgraph, Groq, seaborn, SQL, Scikit learn

API, Open API, Gemini API , FastAPI, Uvicorn , Swagger, Pydantic , React.js

Tools : Git & Github , Docker, VS Code, Jupyter Notebook, Postman, RapidAPI (Third Party API)

DataBase : SQL, PostgreSQL (Integration with fastapi)

Projects :

1) Automate Job Search Agent ([github-link](#))

An AI-powered agent, built with LangGraph, that automates job hunting by turning a resume or a job description into a live search across multiple job platforms — no manual keyword-guessing or tab-switching required

2) Resume Analyzer ([github-link](#))

Resume Analyzer is a LangGraph-based AI tool that compares a resume PDF with a job description to evaluate ATS score, skills, keywords, experience, and job match. It provides strengths, weaknesses, improvement suggestions, project feedback, and a final recommendation..

3) Boston House Predictor ([github-link](#))

Boston House Price Prediction is a Machine Learning regression project that predicts house prices using housing and socioeconomic features such as RM, LSTAT, DIS, TAX, and PTRATIO.

4) Chatbot with Fastapi ([github-link](#))

An AI-powered chatbot application built using FastAPI, LangChain, and Groq LLM. conversation stored in postgres

Achievements :

Campus Ambassador – Entrepreneurship Development Cell (eDC), IIT Delhi

- . Selected as a Campus Ambassador for eDC IIT Delhi (2025–26) for a 45-day program, contributing to . .
- campus outreach and entrepreneurship initiatives while earning recognition through a certificate and Letter of Recommendation. ([Certificate here](#))

Kaggle Competition

- . Kaggle – Python Programming: Earned a Kaggle badge for demonstrating proficiency in Python programming and practical coding skills. ([Certificate here](#))
- Kaggle – 5-Day AI Agents Competition: Successfully completed the 5-Day AI Agents challenge and earned a badge for hands-on experience in building AI agents. ([certificate here](#))

Education

Bachelor of Engineering (B.E.)

Kamala Nehru Institute of Technology, Sultanpur

YGPA: 7.86

Important : Currently I am comming In the Third year of BTech degree Branch : Information Technology
